Electrical Contracting Business For Sale

South East Queensland Based

This business specializes in the design and manufacturing of high-quality electrical switchboards, fully compliant with Australian standards AS/NZS 61439.1:2016.

With a focus on innovation, quality, and customization, they provide complete, design-verified solutions tailored to meet the specific needs of each project.

In addition to electrical solutions, they offer comprehensive in-house design, sheet metal fabrication, powder coating and CNC punching services, allowing them to maintain precise control over quality, accuracy, and lead times. This capability enables them to deliver durable, expertly crafted products built to withstand the unique demands of industrial, commercial, and infrastructure applications.

Services Include:

- * Main Switchboards, Motor Control Centres, Distribution Boards: Custom-built, design-verified, and fully compliant with AS/NZS 61439.1:2016 standards.
- * Sheet Metal Fabrication: Fabrication of enclosures, panels, and switchboards using premium materials such as zinc-annealed mild steel, aluminium, and stainless steel.
- * CNC Punching: Precision punching to achieve complex, high-accuracy designs with minimal waste.
- * Powder Coating: Durable, corrosion-resistant coating in a wide range of colours and finishes, including ripple, orbital, and polished options.
- * Custom Design Solutions: Tailored switchboards and enclosures to suit specific site requirements, including internal separation up to Form 4b and IP ratings up to IP66.

Key Features of Their Electrical Switchboards:

- * Construction: Fully welded, durable construction with customizable finishes, thanks to their in-house powder coating capability.
- * Capacity: Current ratings up to 1600A with short-circuit withstand capability up to 50kA for 3 seconds.

Frank Willett

* **Safety:** Compliance with internal arcing fault standards to enhance operator and system protection.

* **Technology Partnerships:** As an OEM, they work closely with leading technology providers to integrate the best-suited switchgear into their electrical designs. Civil Electrical works

This company delivers comprehensive electrical contracting services. Whether it's electrical installations for infrastructure, commercial developments, they bring the expertise, equipment, and efficiency to handle projects of all sizes.

With their own 5-tonne excavator and tipper trucks, they can provide seamless civil and electrical solutions, reducing reliance on external subcontractors and ensuring greater control over timelines, costs, and quality.

Civil Electrical Capabilities Include:

* **Underground Electrical Infrastructure:** Installation of underground conduits, pits, and cabling for commercial and civil projects.

* **Trenching and Excavation:** Efficient, precise trenching using our 5-tonne excavator, minimizing disruption and meeting project specifications.

* **Lighting Installation:** Street lighting, pathway lighting, and outdoor area lighting, including installation and maintenance.

* **Earthworks and Site Preparation:** Comprehensive site preparation, including trench backfilling, leveling, compaction and concreting or bitumen reinstatement.

What makes Them Different?

* **In-House Equipment:** Their 5-tonne excavator and trucks streamline excavation and trenching work, enhancing project efficiency.

* **End-to-End Project Management:** From design and civil works to electrical installation and commissioning, they manage every stage of the process.

* **Safety and Compliance:** They adhere to strict safety protocols and ensure all works comply with relevant Australian standards.

* **Experienced Team:** Their skilled electricians and operators have extensive experience in civil electrical works and are committed to delivering high-quality results.

By combining electrical expertise with civil capabilities, they provide efficient, cost-effective, and high-performance solutions tailored to the specific needs of civil infrastructure and construction projects
