Leading Business with National Presence

An exceptional opportunity is now available to acquire a nationally recognised business specialising in the delivery of large-scale renewable energy infrastructure projects.

With a long-established reputation for quality, innovation, and reliability, this business operates across Australia, servicing sectors such as government, education, healthcare, transport, and commercial development. Contracts are secured for the next 2 years.

Positioned at the forefront of the renewable energy transition, the business is renowned for its expertise in complex, medium to large-scale infrastructure works. It is ideally placed to capitalise on the growing demand for sustainable energy solutions, with a strong project pipeline and several major contracts scheduled in the future. Supported by a well-established brand, a highly experienced team, and streamlined operational systems, the business presents an excellent platform for further national expansion.

Financially, the business has demonstrated strong and consistent profitability over the past four years, averaging approximately \$1,661,145 million in profit per annum. Future growth prospects are particularly strong, driven by increasing infrastructure investment at both the state and federal levels, including projects associated with the upcoming Brisbane 2032 Olympics and Australia's national renewable energy goals.

The owner, after many successful years of building the business, is now contemplating his exit strategy and is committed to facilitating a smooth transition for the purchaser. This is an outstanding acquisition opportunity for strategic buyers, construction and engineering groups, or investors seeking to expand into the growing renewable infrastructure sector.
