Type: **Services-Other**

### Civil Construction - Road Maintenance & Bitumen Spray Sealing | SE QLD

An outstanding opportunity to acquire a well-established and highly regarded civil construction business servicing Southeast Queensland for over 12 years.

Specialising in bitumen spray sealing, and road maintenance, this business operates with a streamlined model and has earned preferred supplier status with key government bodies and national contractors. The business is asset-rich and includes a full fleet of owned, specialist plant and equipment, ready to step into and scale immediately. The business is currently operated by an experienced owner-operator supported by a casual team member and subcontractors, offering a low-risk, low-overhead platform ideal for expansion.

Revenue is generated predominantly through repeat business and long-standing relationships with local councils and Tier 1 infrastructure firms. The business is also a pre-qualified panel supplier, providing ongoing tendering opportunities in a high-growth infrastructure environment. Ideal for operators in the civil, infrastructure or road construction space seeking geographic expansion, or for hands on buyers with technical backgrounds looking to secure a profitable, contract ready operation.

The Queensland infrastructure sector is surging, with billions in committed projects including Olympic-led Road upgrades and federal funding for highway works, making now the perfect time to acquire.

The current owner is retiring and will provide full handover support.

1. Includes over \$1M in specialist plant and equipment.
2. Owner available for a structured handover to ensure continuity and client retention.
3. Significant upside for growth into government projects, new regions, or staff expansion.

Price: \$1,350,000 WIWO (includes all equipment and goodwill)

Note: All photos are stock images and not of the business listed.
