Transport and Logistics Business For Sale

This is an exceptional opportunity to acquire a reputable logistics and transport business including a massive 3PL warehouse servicing Queensland and beyond. With over 20 years of successful operation, the company has developed a strong reputation for reliability, flexibility, and outstanding customer service. Its client base includes numerous ASX-listed organisations as well as several international accounts.

The business provides comprehensive logistics solutions, encompassing refrigerated and dry transport, storage, and distribution. It offers efficient connections between major Queensland centres, with regular routes to and from Brisbane, including all interstate capitals.

Included in the sale is a modern, well maintained fleet of trucks and vans valued at approximately \$8 million, enabling the company to manage full container loads, including dangerous goods, with ease. The operation also features a 3PL warehouse with a 6,000-pallet capacity, supporting services such as container unpacking, short- and long-term storage, pick and pack, and final distribution-truly providing clients with a complete one-stop logistics solution.

The company holds lucrative contracts within the refrigerated transport sector, with multiple B-double trucks operating daily.

Strong and consistent financial performance has been demonstrated over the years. An experienced management team is in place, including a long-standing General Manager willing to remain with the business, supported by dedicated staff who excel in delivering tailored solutions and superior service. The company's customer-centric approach has resulted in enduring relationships with a broad range of clients.

Further details will be made available to qualified buyers upon request to ensure confidentiality.
