### Fast Growing Solar Installation Company NSW

This is a rare opportunity to acquire a renewable energy business strategically positioned in one of New South Wales fastest-growing clean energy markets. The company is driving large-scale adoption of solar, battery storage, and Virtual Power Plant (VPP) systems, supported by strong government programs and community engagement.

Demand is accelerating as households and small businesses look for affordable solutions to reduce power bills and increase energy resilience. With visible policy backing and broad market momentum, the revenue trajectory is huge, making this a highly attractive growth opportunity.

The business benefits from multiple recurring income streams through VPP participation and battery financing, along with clear scalability into neighbouring markets. Supported by government incentives, community programs, and the increasing urgency of decarbonisation, this company offers buyers immediate exposure to a rapidly expanding sector.

Importantly, the seller is open to remaining with the business under the right structure to see out the growth plan and ensure a smooth transition, providing valuable continuity and expertise for the incoming owner.

This is an ideal platform for expansion, combining sustainable growth, recurring revenues, and strong market positioning.

Projected Revenue 2026 \$11,400,000

Projected EBITDA 2026 \$1,800,000
