Automotive Electrical & Air Conditioning Business Est 20+ Years Beresfield

This long-established automotive electrical and air-conditioning business has been servicing industrial, transport, mining, and agricultural sectors for more than two decades.

Operating from a modern, purpose-built facility supported by multiple mobile service units, the business provides comprehensive electrical, diagnostic, and air-conditioning solutions to a wide range of clients.

With a loyal customer base across commercial fleets, councils, and major contractors, the business benefits from repeat work, preferred-vendor relationships, and minimal customer concentration. Demand continues to outstrip capacity, with consistent enquiries from new

and existing clients.

Revenue is underpinned by a diversified service mix, including advanced diagnostics, wiring harness manufacturing, fatigue management systems, and heavy-vehicle fit-outs, complemented by retail parts and accessory sales. The team of experienced tradespeople and administrative staff ensures operational day to day continuity.

The business operates efficiently under well-developed systems, including cloud-based job management, accounting, and safety frameworks. The owners have equipped the business with quality plant and equipment, and the premises are modern, spacious, and designed for workflow efficiency.

A new long-term lease is available to the incoming owner. Industry trends point to continued growth driven by fleet electrification, increased vehicle technology complexity, and ongoing demand for skilled auto-electrical services. This presents a significant opportunity for a new owner to build on a strong reputation and untapped marketing potential.

A rare opportunity to acquire a market-leading, regionally dominant business with impressive earnings, solid systems, and growth upside.

Price: \$1,000,000 plus stock.
