Established & Profitable Steel Fabrication / Engineering Business | North Brisbane

Long-established | Blue-chip recurring clients | Strong asset base | Genuine growth upside

The Opportunity:

A rare chance to acquire a well-established steel and metal fabrication business in Brisbane's northern corridor. Trading successfully for many years, this is a profitable, systemised operation that runs on its people and processes -not solely the owner.

The business has built its reputation the hard way: well over a decade of reliable, quality work that keeps the phone ringing on referral and repeat orders alone. It has never had a website or any active marketing -which means the upside is sitting right there for a new owner to take.

What you're buying:

- * A long-standing fabrication business with blue-chip anchor clients, including a nationally recognised manufacturer and major building-supply groups
- * Consistent, repeat-order work -not one-off jobs
- * An extensive plant & equipment base: presses, saws, forming machines, welders and a delivery fleet
- * A skilled, stable team that knows the work -reducing reliance on the owner
- * Premises available to lease on a new long-term arrangement (freehold retained by the vendor)

The upside: With no website, no social presence and no active marketing, a new owner has an obvious, low-cost lever to pull. The established blue-chip accounts underpin the business while you grow it -ideal for a hands-on fabricator, an existing engineering or fabrication operator looking to bolt on capacity and customers, or an investor after an established operation with room to move.

Sale details:

- * Offered as an asset sale (business, plant & equipment, plus stock)
- * Price and full financials available to qualified buyers on enquiry
