Type: **Relocatable eCommerce**

Technology-Enabled E-Commerce Business | \$400,000 FME

Acquire this long-established, highly systemised e-commerce business serving corporate, government, and institutional clients throughout Australia. This is a once-in-a-generation opportunity.

Operate a business purpose-built for efficiency, with minimal staffing requirements (just one full-time employee) and supported by trusted third-party suppliers. Established in 2008, it uses outsourced production, fulfilment, and logistics to create a scalable, low-overhead model that is uncommon at this size.

Benefit from a substantial database of more than 3,300 contacts and long-standing relationships with government departments, large corporations and institutional clients across a diverse range of industries. Revenue comes from repeat customers and ongoing new enquiries, reducing reliance on any individual client or sector.

It features a proprietary business management platform that integrates quoting, CRM, project management, workflow management and invoicing into a single streamlined system.

Strong organic Google rankings, established digital assets and a national online presence continue to generate enquiries with limited active marketing.

Forecast Future Maintainable Earnings for FY2026 are approximately \$400,000, offering an attractive return for an owner-operator or a strategic acquirer seeking a highly transferable business with strong cash-flow characteristics.

Key Features:

- Established since 2008
- Low Customer Concentration
- Owner Independent
- Approximately \$400,000 in Future Maintainable Earnings (FME) and projected revenue of \$1.4 million for FY2026
- Operates with just one full-time employee
- National client base including government and corporate customers
- Proprietary systems and technology platform
- Strong recurring and repeat business
- Remote and location-independent operation
- Significant growth potential through marketing and business development

Businesses that combine 100% e-commerce, strong earnings, minimal staffing requirements and scalable systems are seldom available.
