Asking: **\$199,000**
Type: **Communications/Technology**

Established SaaS Job Management Platform with Recurring Revenue and Strong Growth Potential

Acquire an established SaaS business with recurring monthly subscription income and a proven job management platform built for field service industries. Operating since 2017, the business requires minimal owner involvement and is supported by an experienced offshore development team. A recently onboarded seventh client has further strengthened its recurring monthly revenue.

Proven Platform with Significant Market Potential

Originally developed for the traffic management sector, the platform has demonstrated exceptional stability with very few reported software issues. Its functionality is equally suited to a wide range of industries, including:

- * Construction
- * Electrical
- * Plumbing
- * Mechanical
- * Facilities management
- * Other trade and field service businesses

The sale includes the software platform, intellectual property and existing customer agreements, allowing a new owner to continue operations from day one while pursuing growth across multiple industries.

Built for Growth

This opportunity is particularly well suited to an IT business, managed service provider or technology operator looking to expand through an established SaaS product. Immediate opportunities include:

- * Reduce annual cloud hosting costs by migrating from AWS to an Australian-based data centre

Business Brokers Network
Australia
Broker Ref: 26049

- * Leverage an existing technology or software sales team to accelerate customer growth
- * Expand into new trade and service industries where the platform is already well-suited
- * Grow recurring revenue by scaling an established, market-ready software solution rather than building one from scratch

Key Highlights

- * Established SaaS platform with recurring subscription income
- * Seven active clients, with a recently secured customer increasing recurring monthly revenue
- * Stable, commercially proven software with very few reported issues
- * Dedicated offshore development team providing ongoing software support
- * Minimal owner involvement with approximately 30 hours of technical support outsourced each month
- * Suitable across construction, electrical, plumbing, mechanical, facilities management and other field service industries
- * Sale includes the software platform, intellectual property and existing customer agreements
- * Virtual office operation with no commercial lease obligations
