

Rare—Profitable, Established Queensland NDIS Provider: Skip the 2-Year Build

Established, profitable NDIS disability support provider with a multi-region Queensland and Northern NSW footprint, operating from three service hubs with no fixed head office. The NDIS sector is large and government-funded, with structural demand growth. The owner is currently evaluating formal NDIS registration — a step that would unlock Agency-managed clients and further growth for an incoming owner. The business runs on a lean, distributed leadership structure — regional managers supported by a remote administration function — with no premises overheads. It operates profitably with minimal owner involvement (1-3 hours per day, strategic only), and its systemised, scalable model is well-positioned for a strategic acquirer seeking Queensland entry, bolt-on growth, or investment in a structurally growing sector.
