Established Cosmetic & Aesthetics Clinic

Established Cosmetic & Aesthetics Clinic South-West Sydney

Step into an established, premium cosmetic aesthetics and skin clinic with eight years of trading history, a loyal repeat-client base and a diversified non-surgical treatment offering.

Located in South-West Sydney, the clinic delivers cosmetic injectables, laser hair removal, advanced skin treatments, body contouring and LED phototherapy. It generated approximately \$608K in FY26 revenue with a 62.3% gross margin, providing a strong platform for a suitably qualified owner-operator or established clinic group.

The business currently trades only 3.5 days per week, presenting a compelling opportunity to grow revenue through extended trading hours, increased appointment availability and targeted local marketing.

A premium, turnkey equipment suite is included, featuring a Candela GentleMax Pro laser, HydraFacial, SkinPen, Dermafrac, Exilis360 and Dermalux Flex. The sale also includes the fitout, stock, website and digital assets, client database, supplier relationships, operational protocols and goodwill.

Two experienced practitioners are expected to return in late 2026 and early 2027, while the vendor will provide six months of structured transition support to assist with a smooth handover and client continuity.

This is a rare opportunity to acquire a well-positioned aesthetics platform with quality equipment, proven trading history and clear capacity for growth.

Price on Application. Confidentiality Agreement required before release of the Information Memorandum.
