Established Marine Services & Infrastructure Business - 5989

Established Specialist Marine Services & Infrastructure Business - Tropical Queensland

Rare opportunity to acquire a long-established, asset-backed marine services business with multiple complementary revenue streams and a substantial operating capability already in place.

Key Sale Highlights:

- Commercial diving, marine construction and underwater inspection capability
- Mooring installation, maintenance and specialist cyclone-resilient design know-how
- Established portfolio of commercial moorings available for hire
- Commercial work vessel, two complete diving spreads and recompression chamber included
- Marine transport, delivery, salvage and vessel recovery capability
- Long history servicing government, infrastructure, tourism, commercial and private clients
- Specialist plant, equipment, systems and established industry relationships

The business has been built over many years in demanding tropical marine conditions and combines the assets, technical capability, project history and market knowledge required to service a broad range of marine clients.

Its experience spans routine recurring maintenance and inspection work through to larger, technically complex marine and underwater infrastructure projects. The business has also developed substantial practical expertise in cyclone-resilient mooring systems, including site-specific design and installation for severe tropical conditions.

This is a compelling acquisition for an existing marine, civil, diving or infrastructure-services operator seeking immediate market presence, productive marine assets and established capability without the time and capital required to build a comparable operation from the ground up.
